Journal of Automated Reasoning (2006) 37 © Springer 2007

Contents to Volume 37

Volume 37 Nos. 1–2 2006

Special Issue on

Empirically Successful Automated Reasoning: Applications Issue

Guest edited by Bernd Fischer, Geoff Sutcliffe and Stephan Schulz

BERND FISCHER, GEOFF SUTCLIFFE and STEPHAN SCHULZ / Empirically Successful Automated Reasoning: Applications Issue 1

R. VEROFF and M. SPINKS / Axiomatizing the Skew Boolean Propositional Calculus 3–20

JOSEF URBAN / MPTP 0.2: Design, Implementation, and Initial Experiments 21–43

CARSTEN SINZ, WOLFGANG KÜCHLIN, DIETER FEICHTINGER and GEORG GÖRTLER / Checking Consistency and Completeness of On-Line Product Manuals 45–66

JOSÉ-LUIS RUIZ-REINA, FRANCISCO-JESÚS MARTÍN-MATEOS, JOSÉ-ANTONIO ALONSO and MARÍA-JOSÉ HIDALGO / Formal Correctness of a Quadratic Unification Algorithm 67–92

PANAGIOTIS MANOLIOS and SUDARSHAN K. SRINIVASAN / A Framework for Verifying Bit-Level Pipelined Machines Based on Automated Deduction and Decision Procedures 93–116

OLIVER PELL / Verification of FPGA Layout Generators in Higher-Order Logic 117–152

Volume 37 No. 3 2006

Third Special Issue on

Techniques for Automated Termination Proofs

Guest edited by Jürgen Giesl and Deepak Kapur

JÜRGEN GIESL and DEEPAK KAPUR / Third Special Issue on Techniques for Automated Termination Proofs 153–154

JÜRGEN GIESL, RENÉ THIEMANN, PETER SCHNEIDER-KAMP and STEPHAN FALKE / Mechanizing and Improving Dependency Pairs 155–203

KUSAKARI KEIICHIROU, NAKAMURA MASAKI and TOYAMA YOSHIHITO / Elimination Transformations for Associative–Commutative Rewriting Systems 205–229

Volume 37 No. 4 2006

OLIVIER BAILLEUX and PIERRE MARQUIS / Some Computational Aspects of DISTANCE-SAT 231–260

GILLES DEQUEN and OLIVIER DUBOIS / An Efficient Approach to Solving Random *k*-SAT Problems 261–276

STEVEN GIVANT / The Calculus of Relations as a Foundation for Mathematics 277–322

SÉBASTIEN LIMET AND GERNOT SALZER / Tree Tuple Languages from the Logic Programming Point of View 323–349
